- Why do you believe version control is trending in the industry?
 - [Version control is an industry trending system that allows for multiple people to work on the same file at the same time and merging all versions. The file remains in one centralized location with the most up to date version readily available at all times.](#)
[The VCS also retains all previous versions and can be obtained at any point for reference acting as a back up for the file. The two main aspects of the VCS are crucial to industries for increased efficiency and reliability.](#)
